PROGRAM 1: Reverse an array elements

The screenshot shows the SIMATS Online Programming Lab interface. The browser address bar displays "simatslab.saveetha.com/practice_app/classactivity/attempt?assignment_id=224". The page header includes the SIMATS ENGINEERING logo, the title "SIMATS Online Programming Lab", and the user profile "Charumathi M 192524198RA". The main content area is titled "Write a C program that takes an array as input and returns it reversed." The "Your Code" section contains the following C code:

```
1 #include <stdio.h>
2 int main() {
3     int arr[100], i;
4     printf("enter the number: ");
5     scanf("%d", &n);
6     printf("enter the array elements:");
7     for(i=0; i<n; i++){
8         scanf("%d", &arr[i]);
9     }
10    printf("array in reverse order:\n");
11    for(i=n-1; i>=0; i--){
12        printf("%d", arr[i]);
13    }
14    return 0;
15 }
```

The "Input" section has a text box labeled "stdin input". The "Output" section displays "System error." Below the code editor are buttons for "Run", "Save", and "Submit". The footer indicates "© 2026 SIMATS Online Lab. All rights reserved."
